## The Official Newsletter of Indian Society of Pedodontics and Preventive Dentistry

### Who We Are

The Indian Society of Pedodontics and Preventive Dentistry (ISPPD) is a national society specifically concerned with the oral health of children in India. It aims to improve oral health in children and encourage the highest standards of clinical care. ISPPD has over 2000 Pediatric Dentists as life members. The Indian Society of Pedodontics and Preventive Dentistry has been formed on the firm belief that "Every child has a fundamental right to his total oral health". The Society has an obligation to fulfill this faith.

Theme of the year :- "Healthy Mother - Smiling Child"

Slogan of the year :- "Each One Get One"

# ISPPD

# Logo

The emblem of the society is based on the famous triad of Keyes (1960). The area of inter section of circles takes the form of Triangles. The triangle connotes two aspects 1. it represents delta, which is the sign of dentistry, 2. it depicts the pedodontic triangle as given by Wright (1975). The top circle of keys in the emblem carries symbols of the emblem of the Indian dental Association ( IDA ) - Staff of Aesculpius with wings of serpents encircling around it. The staff of Aesculpius stands of captor of authority and represents the professional authority of association. The serpents show the power of healing since serpents ages back have been used for healing. Hippocrates adopted this symbol and we have adopted it with two serpents entwined around the staff in opposite directions. The wings on the staff represents the spread of knowledge. The wings have 6 small and 3 large divisions as in the IDA emblem.

## President's Column

Taking on the mantle of the President of our esteemed association, it is a dream come true. I wish to live my dream with purpose so that I see my association on its way to the zenith of its potential. I have long term and short term goals for the association which are the following. The long term goals are as follows - Initiate new state chapters, Propagate membership drive with renewed energy, Transparency in functioning at all levels. I wish that my speciality is one that impacts the society constructively. Looking forward to the continued support of each and every one of you.

**Dr Baby John**

ASST EDITOR

ISPPD Office Bearers and EC members at EC meeting held on 14-02-2019 during Pedopanacea, Meerut.

## **Fellow of ISPPD award at 40th ISPPD conference 2018**

My efforts in clinics, research and academics in pedodontics and preventive dentistry were recognised by Indian Society of Pedodontics and Preventive Dentistry by conferring me the prestigious Fellowship of ISPPD in 2018. This is an honour which motivates me to work harder and contribute towards upliftment of our speciality in future.

## News Letter Editor's Column

SmileTimes.Pedo has been envisaged as the quarterly Newsletter of Indian Society of Pedodontics and Preventive Dentistry. In the inaugural issue we have tried to put forward information to make the members aware of our legacy, works of past few months and future events of ISPPD and Pediatric Dentistry Societies of the World. We have also tried to showcase inputs from members (students and faculty/practitioners. This is in addition to the achiever's column which has been designed to inspire the members to excel and strive for various awards of the society. We look forward to more contributions through email and your feedback. Its always a bidirectional path to excellence and we aspire to do that.

**Dr Nitesh Tewari**

**Dr Nikhil Srivastava**, General Secretary ISPPD has been awarded T C White Travel Grant by the Royal college of Physicians & Surgeons of Glasgow to complete certification course on “Conscious Sedation” at Indiana University USA. He was accompanied by **Dr Gyanendra Kumar, General Secretary SAAPD** for this course. The course mentor was Dr Jeffrey Dean, the author of McDonald’s book of Dentistry for Child and Adolescents.

## What's New in Pediatric Dentistry

### DEXIS CariVu™

DEXIS CariVu is a compact, portable caries detection device that uses patented transillumination technology to support the identification of occlusal, interproximal and recurrent carious lesions and cracks.

What makes CariVu unique?

Uses transillumination technology that makes enamel appear transparent while porous lesions trap and absorb light

Allows the clinician to see through the tooth, exposing its structure and the development of any carious lesions. CariVu images read like familiar X-ray images. It uses non-ionizing radiation which is ideal for children, pregnant women and patients who are X-ray averse.
